

MEDICAL EXAMINATION INFORMATION

The following list identifies mandatory medical procedures as part of the U.S. Immigration Medical Examination process (though other specialized procedures may be required for individual applicants):

- Physical Examination
- Chest X-Ray (applicants 15 and older)
- Serologic (HIV/Syphilis) Exams (applicants 15 and older)
- Vaccinations

A list of the sole authorized providers of all medical services required for U.S. Immigration is provided on the attached document. No medical providers, other than those specified, are authorized by the U.S. Embassy to conduct medical examinations for prospective U.S. Immigrants. Individual providers may only perform the services specified below. Visa applicants may have to go to multiple facilities to complete the necessary procedures.

The below list is effective as of February 2008. All examinations and services performed on or after that date will only be accepted if they were performed by these providers. Medical reports from unauthorized providers will not be accepted and applicants will be asked to go to a provider on this list to re-do that portion(s) of the medical examination at their own expense.

When you visit any of the medical providers below, you must present your passport. You will also need to provide three passport-sized photos at your physical/mental examination. Fees are paid directly to the provider at the time of service and are the sole responsibility of the visa applicant(s).

LIST OF APPROVED MEDICAL SERVICE PROVIDERS
