

MEDICAL EXAMINATION INFORMATION

Dear Applicant:

You are required to obtain the following tests and vaccinations as part of your U.S. Immigration Medical Examination process:

- Physical Examination
- Chest X-Ray (applicants 15 and older)
- Serologic (Syphilis) Exam (applicants 15 and older)
- Vaccinations

In some cases, the physician may require additional specialized tests.

We only accept medical exam results from the providers listed below. Some providers of the medicals may not be able to perform all the required tests. This may require you to go to multiple facilities to complete the exams.

Please note that test results are valid for 6 months. Visa applicants will need to re-do any test that has expired. We recommend that applicants begin the vaccination process as early as possible and complete the rest of the medical examination as close to the date of visa interview as possible.

Once you have completed the tests and vaccinations, please request the results from the clinic in a sealed envelope which you must bring with you on your next consular interview.

Please bring your passport and three passport sized photographs with you when you visit any of the medical providers below. Applicants are responsible for all medical fees and are expected to make payment to the service provider at the time of the exam or vaccination.
