

**Embassy of the United States of America  
Port of Spain, Trinidad and Tobago**

Every applicant for an immigrant or fiancé (e) visa is required to undergo a medical examination by a physician authorized by the U.S. Embassy. Immunizations are also required before a visa can be issued. Applicants must contact the physicians directly to arrange an appointment. All examination and immunization fees are the responsibility of the applicant.

Only the following physicians are authorized to conduct medical examinations of visa applicants. The fees listed below are for the medical examination, chest x-ray, blood test and urine test only. **Immunizations and additional tests (if required) will require the payment of an additional fee.** Applicants should bring their valid passports, five passport photographs of themselves with a white background, valid national ID or Driver's Permit, the appointment letter with the PTS case number, the intended US address, and records of any major illnesses or immunization, if available, to the medical examination.

**Please have your medical examination completed at least two weeks prior to your scheduled appointment date. Go directly to the physician; they will refer you to the appropriate laboratory for further tests. You must also present your valid passport and ID to the radiologist for identification purposes.**
